Introduction

Qualifications Pack – Telecom Terminal Equipment Application Developer (Android)

SECTOR: TELECOM

SUB-SECTOR: Handset (Terminal Applications)

OCCUPATION: Terminal Equipment Application Developer

REFERENCE ID: TEL/Q2300

ALIGNED TO: NCO-2015/2153.0101

Brief Job Description: Telecom Terminal Equipment Application Developer is responsible for creating customized Applications for Android platform that can be used by Smartphone or Tablets running on Android Operating System. Developer creates User Interfaces, writes business logics for events, activities and business logic defined by the app. The Developer also performs unit tests for the codes written and also ensures that adequate security measures are taken to protect valuable data used in the app by unauthorized external agents.

Personal Attributes: This job requires the individual to have good Programming Skills in Java, knowledge of Object Oriented Programming, Multithreading and operating System concepts. Additional skills including communication skills strong customer service, strong problem solving skills; should be self motivated; should be able to apply practical judgement to successfully perform the assigned responsibilities and a team player with ability to work with team and under pressure.

Job Details	Qualifications Pack Code	TEL/Q2500		
	Job Role	Telecom Terminal Equipment Application Developer (Android)		
	Credits (NSQF)	TBD	Version number	1.0
	Sector	Telecom	Drafted on	12/06/2016
	Sub-sector	Handset Segment	Last reviewed on	12/06/2016
	Occupation	Communication Electronics	Next review date	12/08/2018
	NSQC Clearance on	DD/MM/YYYY		

Job Role	Telecom Terminal Equipment Application Developer (Android)
Role Description	Telecom Terminal Equipment Application Developer is responsible for interpreting the business logic required to create an Android Application, Creating User Interface, Writing Business logics for events and actions, processing data and information, testing the application and publishing application.
NSQF level	4
Minimum Educational Qualifications*	12 th Pass preferably
Maximum Educational Qualifications*	ITI Diploma, BSc. Computer Science, B.Tech (Telecommunication Computer Science)
Training	Practical Knowledge of Java Programming Language is essential
Minimum Entry Job Age	18 Years
Experience	0-2 years
Applicable National Occupational Standards (NOS)	Compulsory: TEL/N2300 (Setting up Android Application Development environment & creating User Interface) TEL/N2301 (Creating Android VAS Application) TEL/N2302 (Creating Applications for Android Tablets) TEL/N2313 (Testing and Publishing Android Applications)
Performance Criteria	As described in the relevant OS units

Definitions

Keywords /Terms	Description
Sector	Sector is a conglomeration of different business operations having similar businesses and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/related set of functions in an industry.
Function	Function is an activity necessary for achieving the key purpose of the sector, occupation, or area of work, which can be carried out by a person or a group of persons. Functions are identified through functional analysis and form the basis of OS.
Job Role	Job role defines a unique set of functions that together form a unique employment opportunity in an organization.
OS	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the knowledge and understanding they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria	Performance Criteria are statements that together specify the standard of performance required when carrying out a task.
NOS	NOS are Occupational Standards which apply uniquely in the Indian context.
Qualifications Pack Code	Qualifications Pack Code is a unique reference code that identifies a qualifications pack.
Qualifications Pack	Qualifications Pack comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A Qualifications Pack is assigned a unique qualification pack code.
Unit Code	Unit Code is a unique identifier for an Occupational Standard, which is denoted by an 'N'.
Unit Title	Unit Title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Knowledge and Understanding	Knowledge and Understanding are statements which together specify the technical, generic, professional and organizational specific knowledge that an individual needs in order to perform to the required standard.
Organizational Context	Organizational Context includes the way the organization is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical Knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills or Generic Skills	Core Skills or Generic Skills are a group of skills that are key to learning and working in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.

Acronym	Keywords/Terms	Description
	JDK	Java Development Kit
	IDE	Integrated Development Environment
	SDK	Standard Development Kit
	ADT	Android Development Tools
	ADV	Android Virtual Devices
	UI	User Interface
	API	Application Programming Interface
	SQL	Standard Query Language
	SMS	Short Message Services
	VAS	Value Added Services
	SHE	Safety Health & Environment
	OHS	Operational Health & Safety

TEL/N2300 Setting up Android application development environment & creating user interface

National Occupational Standard

Overview

This unit is about Handling Data and Content Providers, Creating Value Added Services using Messaging, Networking, Email, Location Based Services.

TEL/N2300 Setting up Android application development environment & creating user interface

National Occupational Standard

Unit Code	TEL/N2300
Unit Title (Task)	Setting up Android application development environment & creating user interface
Description	This unit is about setting up the Android Application Development environment and creating the User Interface for Android Application
Scope	This unit/task covers the following: - Understanding the Android Application Development Framework - Setting up Android Application Development Environment - Creating Android Projects - Creating Android User Interface Elements
Performance Criteria (PC) w.r.t. the Scope	
Element	Performance Criteria
Understanding the Android Application Development Framework	To be competent, the user/individual on the job must be able to PC1. differentiate various Mobile operating Systems, key features and benefits PC2. identify key features for various versions of Android PC3. identify the various tools and software required for developing an Android Application
Setting up Android Application Development Environment	The user / individual on the job should be able to: PC4. install Java and Android SDK PC5. install Eclipse IDE PC6. configure Android Development Tool PC7. create Android Virtual Devices PC8. identifying the components of an Android Project
Creating Android Projects	PC9. creating an Android Project PC10. identifying the role of .src, Android Library, gen, assets, res, Android Manifest.xml
Creating Android User Interface Elements	PC11. understanding activities and Intents PC12. Applying Styles and themes to activities PC13. Creating Dialog window and Process Dialog PC14. Linking Activities using Intents PC15. Creating built in Application using Intents PC16. Using Intent Object, Intent Filters and Categories PC17. Displaying Notifications PC18. Understanding the components of a Screen, Views and viewGroups PC19. Understanding Absolut Layout, Linear Layout, Table Layout, Relative Layout, Frame Layout and Scroll Layout PC20. Adapting to display orientation using anchoring views, resizing and repositioning Managing Screen Orientation PC21. Creating User Interfaces programmatically PC22. Listening for UI Notifications

TEL/N2300 Setting up Android application development environment & creating user interface

	PC23. Creating Basic Views (TextView, Button, ImageButton, EditText, CheckBox, Toggle Button, RadioButton, RadioGroup, ProgressBar, AutoCompleteTest View, TimePickerView, DatePickerView, ListView, SpinnerView) PC24. displaying Pictures using Imageview, ImageSwitcher and GridView PC25. Using Menus, Helper Methods, Options Menu and Context Menu PC26. Working with Android camera
Knowledge and Understanding (K)	
A. Organizational Context (Knowledge of the company /organization & its process relevant to area of responsibilities)	The user/individual on the job needs to know and understand: KA1. project Management concepts and applications KA2. risk and impact of not following defined procedures/work instructions KA3. escalation matrix for reporting identified incidents, troubles and/ or emergencies e.g. system failures, fire and power failures KA4. records to be maintained and implications of non-maintenance of the same KA5. SHE and OHS guidelines and regulations as per company's norms
B. Technical knowledge	The user/individual on the job needs to know and understand: KB1. Object Oriented Programming KB2. Java Programing (OOPS, Classes and Objects, Multithreading, Inheritance, AWT, Networking etc.) KB3. Eclipse (Installation, using Eclipse Interface for creating Java Applications)
Skills (S) [Optional]	
A. Core Skills/ Generic Skills	Basic Reading & Writing Skills
	The user/ individual on the job needs to know and understand how to: SA1. fill up appropriate technical forms, activity logs in required format of the company SA2. maintain proper records as per given format SA3. read and understand manuals, work orders, health and safety instructions, memos, reports etc.
	Communication Skills
	The user/ individual on the job needs to know and understand how to: SA4. corteous to the customers SA5. liaisioning and coordination skills SA6. communicate with supervisor and peers SA7. communicate in the local language (preferable)
B. Professional skills	IDE installation/Task Management Skills
	The user/individual on the job needs to know and understand how to: SB1. Installing Java, Android SDK and Eclipse SB2. work systematically with required attention to detail and adherence to all safety requirements
	Technical Skills
	The user/individual on the job needs to know and understand how to : SB3. Read and comprehend/understand equipment installation manual SB4. Interpreting Application Requirements SB5. Interpreting UI requirements

National Occupational Standard

Overview

This unit is about Handling Data, Content Providers and creating Android VAS applications.

TEL/N2301

Creating Android VAS Application

National Occupational Standard

Unit Code	TEL/N2301
Unit Title (Task)	Creating Android VAS Application
Description	Involves in working with Data sources, Databases, Content Providers, Messaging Services, Email Services, Networking Services, Location Based Services, Creating customized Android Services
Scope	This unit/task covers the following: • Data Handling • Messaging and Networking • Location Based Services • Developing Android Services
Performance Criteria (PC) w.r.t. the Scope	
Element	Performance Criteria
Data Handling	The user/ individual on the job should be able to: PC1. Implementing Data Persistence PC2. Sharing and Loading user Preferences PC3. Storing Data to internal Storage, External Storage (SD Card) and static resources PC4. Storing Data in Cloud PC5. Using Database SQL Lite PC6. Applying SQL commands PC7. Using Contacts with Database PC8. Bundling Database with Application PC9. Using Content Providers
Messaging and Networking	PC10. Sending SMS messages programmically PC11. Sending SMS using Intent PC12. Receiving SMS and Processing SMS PC13. Sending Email PC14. Understanding Networking Fundamentals PC15. Working with Bluetooth PC16. Downloading Text Files, Binary Data, Accessing Web Services PC17. Performing Asynchronous Calls
Location Based Services	PC18. Understanding the MAP concept for Android and Creating a MAP Project PC19. Obtaining the Maps API Keys, Displaying the Map PC20. Controlling the Zoom abd changing the Views PC21. Navigating to specific locations PC22. Adding Markers PC23. Getting a locations that was touched PC24. Geo coding and reverse Geocoding PC25. Monitoring Locations
Developing Android Services	PC26. Creating your Own Android Services PC27. Performing Long-Running tasks, Repeated Tasks, Asynchronous Tasks in a Service PC28. Using Multi Threading PC29. Communicating between a Service and Activity PC30. Building Activities into Services

TEL/N2301

Qualification Pack- Telecom Terminal Equipment Application Developer (Android)

Criteria for Assessment of Trainee					
Job Role	: Telecom Terminal Equipment Application Developer- Android				
Qualification Pack	: TEL/Q2300				
Sector Skill Council	: Telecom				
1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each PC. 2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC. 3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS. 4. Individual assessment agencies will create unique question papers for theory and skill practical part for each candidate at each examination/training center. 5. To pass the Qualification Pack, every trainee should score a minimum 70% of aggregate marks to successfully clear the assessment. 6. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack.
